

includes/projections
/TrimetricProjection.hpp

```
graph TD; A["includes/projections  
/TrimetricProjection.hpp"] --> B["IProjection.hpp"]; B --> C["utility"]; B --> D["cmath"];
```

The diagram illustrates a header file dependency structure. At the top, a grey box contains the path 'includes/projections' and the file name '/TrimetricProjection.hpp'. A blue arrow points from this box to a white box in the center labeled 'IProjection.hpp'. From the 'IProjection.hpp' box, two blue arrows point downwards to two separate grey boxes: 'utility' on the left and 'cmath' on the right.
